

We would like to announce that Alkaloids Corporation, India, and Transo-Pharm Handels-GmbH, Germany, have decided to join hands with the aim to expand Alkaloids' phytochemical product portfolio and global reach.

Transo-Pharm has a very long history in distribution & marketing of APIs like **Digoxin & Scopolamine derivatives** etc., specially those emanating from the previous market leader. In addition, Transo-Pharm has experience in handling GMP and regulatory affairs related aspects for these types of APIs.

Alkaloids has decades of experience and expertise in developing and manufacturing phytochemicals for the pharmaceutical industry. Their GMP/quality compliance systems and the avid desire to adapt to changes in manufacturing techniques has enabled Alkaloids to supply consistently phytochemicals to the US & EU. The audit reports by the USFDA, other authorities and by several multinational companies are very encouraging.

We have set up the partnership structure in a way that enables Alkaloids to focus on production & quality excellence while Transo-Pharm's focus will be on the commercial side, supply chain and adding **regulatory support**.

We strongly believe that this is the best model to serve our worldwide customers in an optimal and efficient manner.

We therefore kindly request you to approach **Transo-Pharm** for any kind of commercial, supply chain or regulatory related questions/support. Please contact:

Mr. Stephen Mitchard; mitchard@transopharm.de or
Mr. Stefan Bertram; bertram@transopharm.de
